
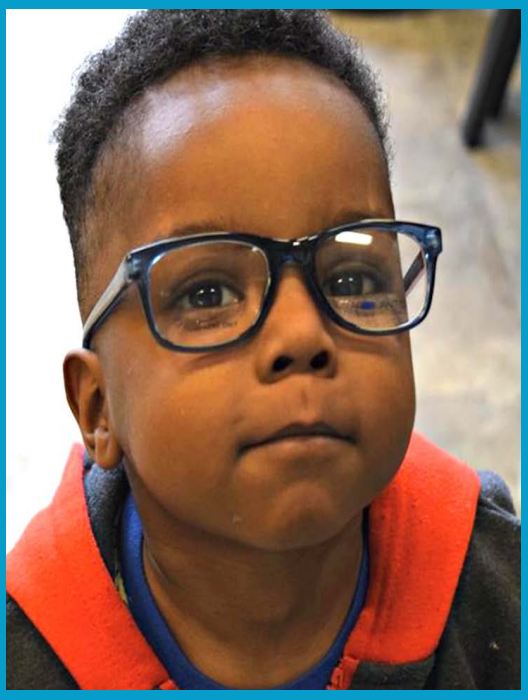
BIENNIAL REPORT

Sight Savers™ AMERICA

2019 - 2020



A message from the president...

I hope this message finds all of our partners and funders safe and well from the uncertainties of the COVID-19 pandemic. I want to thank you and the Sight Savers America Board and Staff for helping us navigate these turbulent times, allowing us to continue improving the lives of the children we serve.

Like most organizations, we faced numerous challenges during the pandemic and adapted in order to shield our nonprofit and those whom we serve from its impact. We successfully met all challenges and are well-positioned to continue to sustain and expand upon past achievements. Our financial condition remains strong and our Eye Care, Low Vision, and Screening programs continued to serve those in need throughout 2019 and 2020. Below are a few significant details of the past two years:

- The pandemic led to a decreased number of children vision screened in the community by our partners, resulting in less referrals to our Eye Care Program. The amount of time staff dedicated to each child's eye care dramatically increased due to the need for appointment rescheduling and expanded communication with parents.

- Our Low Vision Program increased the number of individuals receiving high-tech vision aids and even expanded to our 15th state. This was accomplished through virtual meetings, allowing for one-on-one remote trainings and additional training sessions as needed.

- Our Screening Program worked diligently with school officials and provided screening opportunities never before offered by Sight Savers America. This included screenings for virtual learners after school hours and multiple day screening events for schools utilizing alternating day schedules.

We also experienced major leadership changes within Sight Savers America in the summer of 2020. Margie Haddox retired on May 27, 2020. Margie's expert advice, dedication and passion for Sight Savers America will be greatly missed! She was involved in a wide range of activities since inception, including the design and implementation of the Eye Care Program, the creation of the Low Vision Program, and strategic positioning for expansion.

Bill Burrus, our longtime Chairman of the Board, passed away on July 7, 2020. Bill was an inspiration! He had a true passion for service and was always willing to lend a helping hand with a smile on his face. The Sight Savers America Board, Staff and I miss him tremendously and are so grateful for his enduring friendship and leadership.

Thank you for your support and involvement in the work of Sight Savers America. We look forward to continuing our partnerships with you as we honor the legacy of Bill and Margie to improve children's eye care.

Regards,

Jeff Haddox

SIGHT SAVERS AMERICA TEAM

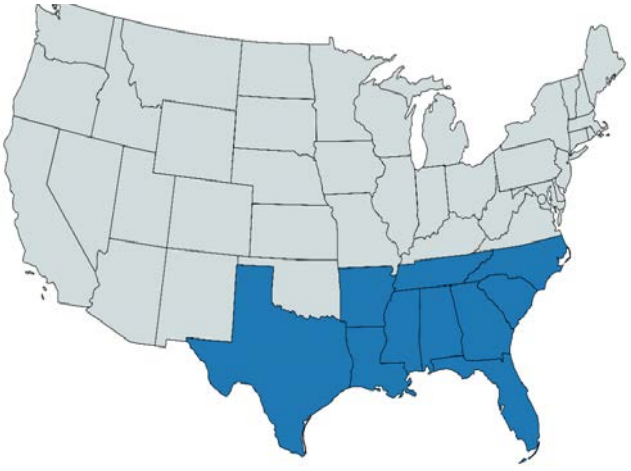
EYE CARE PROGRAM

Sight Savers America's Eye Care Program is a national model for children's individual case managed follow-up eye care. This one-of-a-kind program partners with many vision screening and other referring organizations and over 1,300 eye care professionals who provide comprehensive eye care services to children in need, helping them achieve their best vision. From birth until their 19th birthday, all aspects of a child's eye care needs are managed through our detailed follow-up (including extensive eye care education/awareness, comprehensive dilated eye exams, eyeglasses, medications, vision therapies, aphakic contact lenses, surgeries, and and all other necessary treatments).

Each of the nearly 100,000 children referred in the past two years received one-on-one cased managed eye care. Sight Savers America (SSA) continues to serve children statewide in Alabama, Mississippi, Tennessee and South Carolina and in areas of Florida, Georgia, North Carolina, Arkansas, Louisiana and Texas. Since the program's inception, we have provided eye care for nearly 700,000 children with unmet vision needs. SSA provides a local eye care home and coordinates recurrent eye exams and prescribed treatments throughout a child's formative years. The vast majority of these children are assisted numerous times from preschool all the way to high school graduation.

Working closely with partners and following all local/state/federal safety guidelines, SSA continued operations during COVID-19, ensuring school children received all needed eye care services. Parents of children with scheduled eye exams affected by the pandemic were informed their child's appointment would be rescheduled. Case Managers worked with individual eye care offices to reschedule cancelled appointments and communicated their safety protocols to parents/guardians.

Sight Savers scheduled an exam with a great doctor. She told us Kahlea not only needed glasses but patching too. I'm so grateful to Sight Savers that her eyes are going to be ok now!
-Kahlea's mom



STATES SERVED

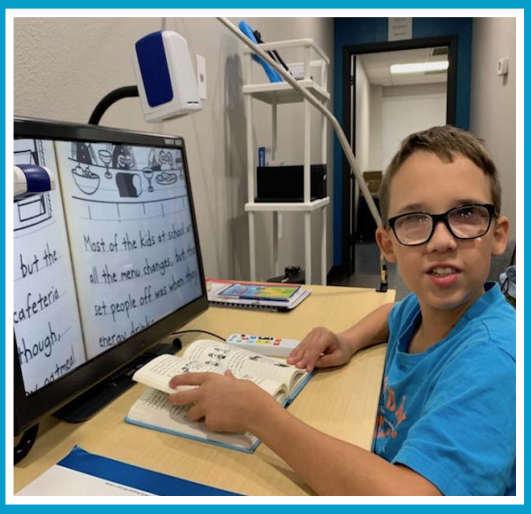
Sight Savers America	FY 2019	FY 2020*
TOTAL CHILDREN REFERRED FOR FOLLOW-UP EYE CARE	52,742	43,733*
CHILDREN RECEIVING EYEGLASSES**	22,203	17,152*
CHILDREN WITH POTENTIAL AMBLYOPIA	4,747	3,936*
CHILDREN RECEIVING OTHER TREATMENTS & CONTINUING CARE	449	221*
CHILDREN WITH NO FURTHER TREATMENT CURRENTLY PRESCRIBED	4,026	2,652*
CHILDREN RECEIVING PARENT HANDLED EYE CARE AFTER THOROUGH SSA CASE MANAGEMENT/EDUCATION	26,240	23,786*

*SSA received fewer referrals from various screening programs due to COVID-19 in FY 2020.

**Some children received multiple outcomes.

We have witnessed firsthand the measurable impact that [Sight Savers America's Vision Screening Program] and eye care follow-up have had on the participating schools and students, particularly underserved children ...a pair of glasses, medications, or assistive technology for those with low vision can make a tremendous difference in improving their academic achievements as well as their overall quality of life. - Lynne P. Meadows, MS, BSN, RN, Director of Student Health Services, Fulton County Schools, GA

LOW VISION PROGRAM



Sight Savers America (SSA) is the only organization in the United States that proactively places high-tech vision aids, such as Electronic Video Magnifiers (EVMs), into the homes of children with severe visual impairment on a city or statewide scale – all at no cost to qualifying families. EVMs are more expensive than the average family can afford and are not covered by medical insurance.

EVMs are life-changing devices that allow each child to make the most of his or her remaining vision. They dramatically enhance contrast and magnify objects up to 118x, and will open up a new world of opportunity, allowing a child to read, write, groom themselves, and even see their loved ones' faces clearly.

Over the past two years, our Low Vision Program has continued to expand across the United States and provided services for over 3,000 individuals in 15 states (AL, AR, AZ, CA, FL, GA, HI, IL, LA, MS, NC, OH, SC, TN, and TX). SSA has successfully eliminated the backlog of children with low vision needs in all of Alabama, Mississippi, and the panhandle of Florida, over 50% of Texas, as well as over 75% of Louisiana, and significant portions of several other cities and states.

Once the original backlog is eradicated within a city/state, the program's maintenance phase—for children who may age into the program, move into the area, or develop new eye problems—serves a smaller number of children newly identified each year (approximately 10% of the original need). When additional funding allows, SSA also serves adults with low vision and individuals needing blind aids.

Sight Savers™ AMERICA	FY 2019	FY 2020*
CHILDREN RECEIVING EVMs	371	379*
ADULTS RECEIVING EVMs	59	64*
OTHER VISUAL/BLIND AIDS	403	645*

*Due to the ability to conduct virtual trainings during the pandemic, **NO** reduction in low vison services occurred in FY2020.

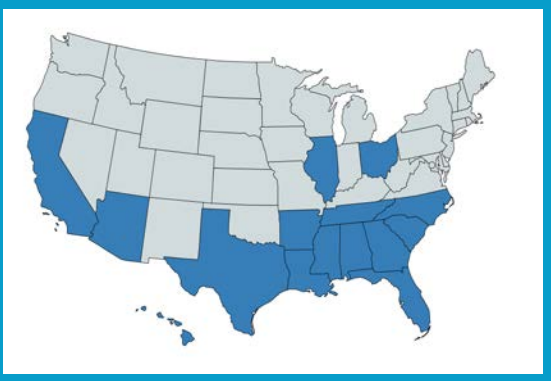
***NOTE:**
140 virtual trainings in all **15** states were conducted between July-September of 2020.



STATES SERVED

CHILDREN & ADULTS CONTINUED TO RECEIVE HIGH-TECH VISION AIDS THROUGHOUT COVID-19

As the pandemic emerged in 2020 and schools moved to virtual instruction, it became even more essential for children and adults with severe visual impairment to have high-tech vision aids in their homes to help them read, write, and complete school assignments. Prior to the pandemic, in-person trainings were conducted at a clinic for multiple individuals or in a family's home. Once face-to-face trainings were not possible, we began shipping the vision aids directly to the recipient's home and held virtual training sessions.

These sessions have been very effective, allowing us to increase the training time with each person, as well as perform additional training sessions when needed. As a result, there has been no decrease in the number of people served and we will continue virtual trainings when appropriate.

I wanted to thank your organization for the gift of an EVM. I have been able to graduate high school, receive my associates degree and now pursue a bachelors degree in education. - Lindsay

SCREENING PROGRAM

Sight Savers America's Screening Program provides vision screenings in Alabama Georgia, Louisiana, Mississippi, and Texas, and health screenings in Alabama. Our staff and partners worked closely together to ensure school children continued to receive these important screenings and follow-up care during COVID-19.

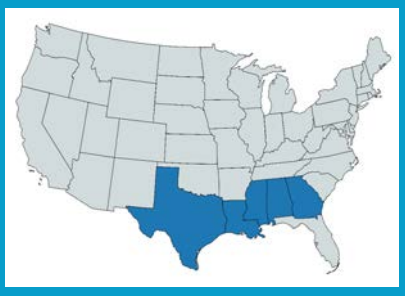
VISION SCREENINGS

Sight Savers America's Vision Screening Program provides school-based vision screenings using a Plusoptix vision screener. In less than one second, the state of the art optometric device screens for anisocoria, anisometropia, astigmatism, corneal reflex abnormalities, myopia, hyperopia, and indications of amblyopia. If not identified and treated early on, amblyopia can cause permanent vision loss. All children found to have a potential vision issue are referred to our Eye Care Program for comprehensive case managed follow-up eye care.

Over the past two years, the Vision Screening Program continued to expand preschool screenings in Head Starts, daycares, and preschool programs in the Lower Pearl River Valley of MS and the greater San Antonio, TX area. During the 2019-2020 school year, Sight Savers America (SSA) restructured the Vision Screening Program in Fulton County, GA schools. SSA now performs these screenings and has increased the number of 3rd and 5th graders served annually to 4,000 students.

Sight Savers AMERICA	FY 2019	FY 2020*
CHILDREN SCREENED	22,708	18,064*
REFERRED FOR FOLLOW-UP EYE CARE	5,690	5,454*

***SSA screened fewer children & received fewer referrals in FY2020 due to COVID-19.**



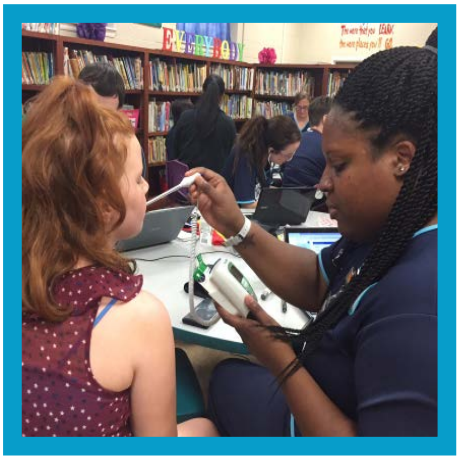
VISION SCREENING STATES SERVED

PLUSOPTIX VISION SCREENER

- Provides full refraction data and screens for vision problems including anisocoria, anisometropia, astigmatism, corneal reflex abnormalities, myopia and hyperopia.
- Captures data in less than one second, ensuring students miss a minimal amount of classroom time.
- Provides a screening method not biased by interpretation of the person performing the screening, nor by poor cooperation or development level of the child.

SSA provides vision screenings through a variety of programs:

- SSA Health Screenings (statewide in AL)
- San Antonio Metro & Texas Hill Country
- Fulton County, Georgia
- Alabama Black Belt
- Mississippi Lower Pearl River Valley
- Caddo & Bossier Parishes, Louisiana
- Private Schools

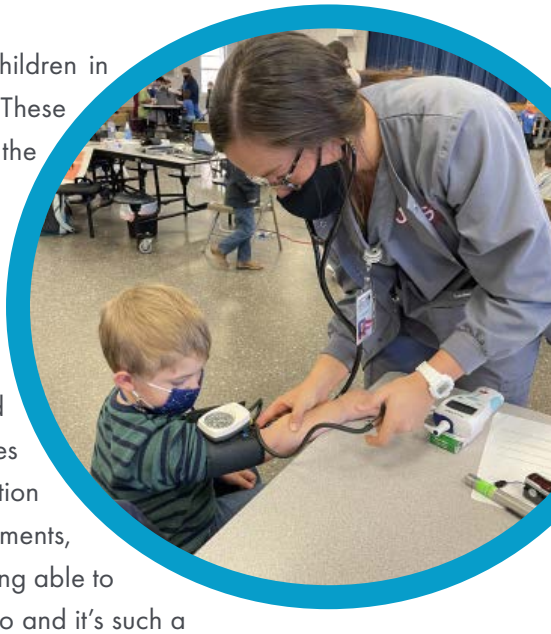


Sight Savers America	FY 2019	FY 2020*
CHILDREN SCREENED	15,682	11,374*
SCHOOLS PARTICIPATING	62	51*

***SSA screened fewer children in FY2020 due to school closings during COVID-19.**

HEALTH SCREENINGS IN ALABAMA

Sight Savers America's Health Screening Program provides annual head-to-toe health screenings to preschool-12th grade students in underserved schools across Alabama. These screenings detect potential vision and health issues impeding a child's ability to learn and perform at their best.



Through expanded funding, SSA provided health screenings to an additional 5,000 children in Alabama's Black Belt and surrounding counties during the 2019-2020 school year. These screenings were not affected by the pandemic because their event dates occurred prior to the pandemic.

Over the past two years, our partnerships with nursing and professional schools throughout the state have provided valuable clinical experiences for 3,639 future nurses and professional students. A faculty member from Samford University's Moffett & Sanders School of Nursing recently told us, "I cannot begin to express my gratitude for your continued partnership and investment in our nursing students. Providing health screening experiences and opportunities for our students has truly opened their eyes and given them an appreciation why these preventive screenings are so very important. Through student reflections and comments, we've seen growth and understanding that might not have happened were it not for us being able to partner with you like we have. We wholeheartedly believe in and support the work you do and it's such a blessing to be part of it."

Health Screening Stations:

- Vision
- Dental
- Height & Weight with BMI
- Vital Signs
- Chest & Abdomen
- Eyes, Ears, Nose & Throat
- Scoliosis
- Skin & Musculoskeletal
- Hearing
- Cholesterol
- Glucose

SIGHT SAVERS AMERICA HERO FOR SIGHT EVENT

Annually, Sight Savers America (SSA) holds a special celebration that brings together a comprehensive representation of Alabama's eye care community, as well as corporate and community leaders across Alabama. This event raises awareness of the work of SSA and honors the recipient of our Hall W. Thompson Hero For Sight Award. This award is presented to an individual or organization whose impact on children's eye care has been both lasting and profound.

Each year, to commemorate the Hero For Sight Award, SSA commissions a painting from an artist with severe visual impairment. A 25-foot long tribute wall on the first floor of the UAB Callahan Eye Hospital is dedicated to SSA. The commemorative artwork is the centerpiece of this tribute wall that also includes space to recognize the work of SSA and the Hero For Sight Award recipients.

2019 Hero For Sight Award Recipient
Dr. Kathy Weise, Director of Pediatric Optometry, UAB School of Optometry •
Commissioned Artist - John Bramblitt

2020 Hero For Sight Award Recipient
Torrey DeKeyser, Executive Director, EyeSight Foundation of Alabama •
Commissioned Artist - Mary Dignan

TOTAL	**$ 4,083,397**	**$4,095,245**

Our Mission Statement:

To identify and secure treatment for unmet vision and health needs.

REMEMBERING BILL

Sight Savers America lost an incredible friend and champion for children's eye care in the summer of 2020.

William E. "Bill" Burrus Jr. passed away on July 7, 2020, at the age of 94. He was known for his spectacular smile, warm heart, positive outlook, generous nature, and let's not forget...a wardrobe of MANY colors. People who knew Bill well often described him as "the nicest person I ever met." He was devout in his faith, loved to dance and loved helping people, especially children in need of eye care. He was blessed with good health and an abundance of energy until his last year. He loved life and lived it well!

Bill was drafted during his senior year in high school and within months was part of the Battle of the Bulge. He received his high school diploma during the war and then attended the University of Alabama. His professional career included 50 years in the insurance and financial planning industry. Bill's interest and enthusiam for children's eye care began because of his daughter's vision issues in her childhood.

Bill served as a Sight Savers America board member since our inception and was our Chairman of the Board until 2019, leading for over a decade. Under his leadership and dedication to our mission, we expanded to serving almost 100,000 children every year.

He was such a gift. We miss him greatly.

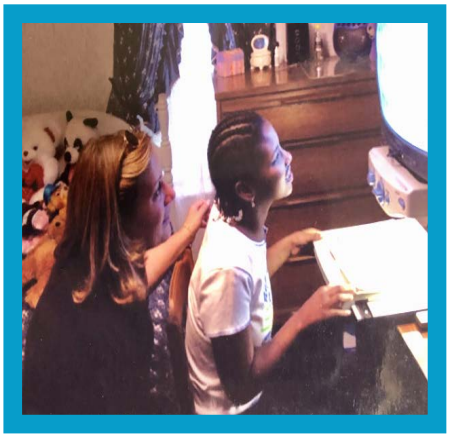
MARGIE RETIRES

Sight Savers America would like to thank Margie Haddox for her dedicted service of 23 years and helping to create a place that has made a real difference in the world.

Margie is a founding member of Sight Savers America (SSA) and was VP and Director of the Low Vision Program until her retirement on May 27, 2020.

Margie's contributions to SSA began in 1997. She was a full-time volunteer for almost 4 years, involved in all aspects of shaping the organization, including designing and implementing the Eye Care Program, creating the Low Vision Program, and the strategic positioning of SSA for expansion.

Margie was hired in 2000 and, over the next 20-plus years, she played an instrumental role in both the Eye Care and Low Vision programs. Most recently, with the help of a dedicated team, she oversaw the expansion of the Low Vision Program into 15 states.



Margie's dedication to SSA is unwavering and her contributions throughout the past 23 years have been invaluable in helping SSA become a national model in children's low vision and eye care services. Whether scheduling eye exams for children in her early days, training a child with severe low vision on an electronic video magnifier, or overseeing a low vision clinic – Margie's heart for service always shined!

Please join us in wishing Margie a wonderful retirement. The good news is, it's not goodbye, as she will be returning to SSA as a volunteer!
